

# ATRASOL® SOLVENTS

Rigorous gas chromatographic controls and extreme operation accuracy in both production and packaging make these the best-suited solvents in gas chromatography for all determinations of traces of organics requiring extreme precision and sensitivity.

High purity, guaranteed absence of extraneous peaks in gas chromatographic determinations and guarantee of reproducibility and repeatability of the results are the main feature of this product line.

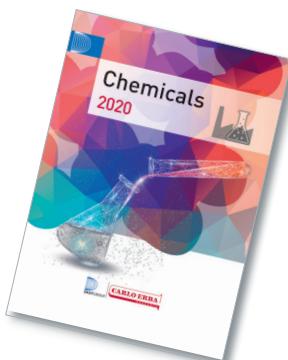

For the entire ATRASOL® line, the absence of critical impurities is ensured by means of precise functionality tests in GC-ECD, GC-FID and GC-NPD.

- GC-ECD (retention range 1,2,4-Trichlorobenzene to dichloromethane individual signals (Carbon tetrachloride standard)): <1µg/ml
- GC-NPD (retention range Atrazin to Coumaphos individual signals (Ethylparathion standard)): <3µg/ml
- GC-FID (retention range before DMF individual signals (hexane standard)): <2µg/ml
- GC-FID (retention range before DMSO individual signals (hexane standard)): <2µg/ml

Product	Pkg	Code
Acetone	1 l	P0053216
	2.5 l	P0053221
	4 l	P0053282
Chloroform stabilized with ethanol	1 l	P02432E16
	2.5 l	P02432E21
	4 l	
Dichloromethane stabilized with amylene	1 l	P02932A16
	2.5 l	P02932A21
	4 l	P02932A82
Dichloromethane stabilized with ethanol	1 l	P02932E16
	2.5 l	P02932E21
	4 l	
n,n-Dimethylformamide	1 l	P0343216
	2.5 l	P0343221
	4 l	
Dimethylsulphoxide	1 l	P0353216
	2.5 l	P0353221
	4 l	
Ethyl acetate	1 l	P0023216
	2.5 l	P0023221
	4 l	
n-Hexane 99%	1 l	P052323016
	2.5 l	P052323021
	4 l	
n-Hexane	1 l	P0523216
<i>Suitable for Hydrocarbon index determination</i>		2.5 l
Isohexane	1 l	P6263216
	2.5 l	P6263221
	4 l	
Methanol	1 l	P0933216
	2.5 l	P0933221
	4 l	
n-Pentane 99%	1 l	P064323016
	2.5 l	P064323021
	4 l	
n-Pentane	1 l	P0643216
	2.5 l	P0643221
	4 l	
Petroleum ether 35 - 60°C	1 l	P0883216
	2.5 l	P0883221
	4 l	
Toluene	1 l	P0713216
	2.5 l	P0713221
	4 l	P0713282
